

Delkor 34-610

Technical Bulletin

R & J Batteries has limited stock available of a new Delkor part number, the 34-610. This is a calcium lead Sealed Maintenance Free (SMF) battery based on a BCI Group 34 size. Configured with Left Hand Positive (LHP) layout and SAE style terminals, this is a battery you can use in various American and other imported style vehicles.

Like all Delkor SMF style batteries, the 34-610 features wrought calcium grids, built in hydrometer, heat sealed covers, patented liquid/gas separator, flame arrestor, low resistance separators and high strength polypropylene case.

Technical Specifications

Part Number	34-610
BCI Group Size	34
CCA	610
RC	110
Length (mm)	260
Width (mm)	172
Terminal Height (mm)	206
Terminal Type	SAE
Layout	LHP

Applications

- Holden Epica (Some Models)
- Chrysler Jeep (Some Models)
- Any 78 DT790 application where you don't need front access terminals
- Any 5022 application (Lower case high but higher CCA)
- Japanese trucks e.g. Isuzu, Hino etc (x 2 batteries)
