

Marine Dual Purpose Batteries

Issue Date: 11/11/2020

Issued By: R & J Batteries PTY LTD

Technical Information

ACDelco has been associated with premium electrical automotive products for over 100 years. Starting its journey as the Remy Electric Company in 1901, their history and experience in automotive technology puts ACDelco at the leading edge of the aftermarket.

The ACDelco HCM range are premium dual purpose marine batteries designed for both engine starting and cycling applications including boats, caravans, 4WD's and RV's. ACDelco's lead-calcium technology provides many benefits including high vibration resistance, low self discharge and ultra low water loss - all important factors for battery performance and reliability. If you require a high CCA marine starting battery, please refer to the ACDelco Marine Starting battery range.

Features and Benefits

- Dual terminals for easy connection of external battery charger or accessories
- High resistance to vibration
- High density paste for improved cycling performance
- Low resistance envelope separators to protect against internal short circuits
- Durable polypropylene case

ACDelco HCM Dual Purpose Batteries Technical Specifications

Part Number	Case Size (BCI)	CCA	20HR (Ah)	RC (min)	L x W x H	Terminal Type	Layout	Hold Down
HCM24LSMF	Grp 24	580	82	140	275 x 172 x 225	Marine Twin	(RHP)	B7
HCM24SMF	Grp 24	580	82	140	275 x 172 x 225	Marine Twin	(LHP)	B7
HCM27LSMF	Grp 27	680	97	162	305 x 172 x 225	Marine Twin	(RHP)	B7
