

Technical Specifications

Battery Type:	Maintenance-Free Accessible	Container Material / Colour:	PP / Opaque
Voltage:	12 V	Lid Type / Colour:	PP / White
Capacity (@20hr rate):	120Ah	Positive Plate Type:	Full-Frame Silver-Calcium
Cold Cranking Amps -18°C, SAE:	900	Negative	Full-Frame Lead-Calcium-Tin
Cold Cranking Amps - 0°C SAE:	1000	Separator Type:	PE Envelope with Glass-Mat
Reserve Capacity:	260 Min.	Assembly Layout:	5 (LH Positive)
Overall Dimensions:	L515 x W175 x TH210	Terminal Type:	Recessed SAE
Wet Battery Weight:	32.5Kg	BCI Group:	N120 Euro - BHD

Hardcore # EURON120 is a premium quality battery designed specifically for commercial applications requiring a European DIN-spec N120 with bottom hold-down ledges and / or recessed terminals. Calcium plates with added silver and high tin content provide maintenance-free operation, while accessible vent caps allow access for added security / peace of mind, and to comply with Worksafe® recommendations for standby diesel generator applications, etc.

- Calcium – Calcium Maintenance-Free
- High Tin Content with Added Silver
- Full-Frame Positive & Negative Plates
- Anti-Vibration glass-mat lined separators
- Access to check electrolyte levels
- Designed to comply with Worksafe® guidelines for diesel generators

Applications

- European Tractors & Farm Machinery
- European Cranes
- European Telehandlers
- Standby Diesel Power Generation
- Commercial Marine Applications
- Reverse-Polarity N120 (LH Positive)
- Applications requiring N120 casing with Bottom-Hold-Down Ledge
