

## WARRANTY STATEMENT - Predator Motorcycle & Power Sport Battery

R & J Batteries will provide the following warranty to the original purchaser subject to the terms and conditions stated herein. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

### Warranty Coverage

This warranty covers batteries that become unusable or unserviceable due to defects in material and/or workmanship. This warranty covers the battery types listed below, that are sized properly and used in the application for which it was intended and charged with an approved charging profile. Proof of purchase and return of good(s) in question must accompany any request for warranty. No exceptions will be accepted.

BATTERY TYPE	WARRANTY PERIOD
AGM	12 Months
P series lithium	12 months
HP series lithium	12 months

### Warranty Exclusions

This warranty does not apply to batteries that break or fail due to abuse or neglect such as improper installation, over charging, under charging, incorrect application, loose wiring, corroded terminal connections, mishandled or dropped batteries, freezing, explosion or unauthorised battery modifications. As per Australian Consumer Law if the battery usage is not for personal, domestic or household use, then R & J Batteries will not be responsible or liable for any consequential or incidental expense or loss.

#### Lithium Batteries

Lithium batteries must only be recharged using lithium compatible chargers. Use of a non-lithium compatible charger will void the warranty.

A Motobatt Lithium "P" series battery which has been discharged below 8 volts may consequently be rendered non-rechargeable, and any resulting claim will not be accepted unless it can be proven that the battery was faulty prior to discharge. Aggressive and repeated charge/discharge cycles may damage a lithium battery.

A Motobatt Lithium "HP" series battery includes a safety protection feature when discharged below 8 volts. The battery may appear dead with zero volts however this is normal operation, and is not a warranty claim. The battery may be reactivated by charging it using a lithium compatible charger or you can return it to your nearest R & J battery store for assistance.

To request a warranty claim, please contact your nearest R & J Batteries store on 1300 769 282 or find your nearest store at [www.rjbatt.com.au](http://www.rjbatt.com.au)
