

### Technical Information

ACDelco Absorbent Glass Mat (AGM) batteries are precision engineered to offer the ultimate combination of reliability, durability and safety, even under the most demanding applications.

Compared with conventional batteries, the ACS92L5AGM has an increased rate of charge acceptance and can keep up with the high electrical demand required from modern vehicles, including those with Idle Stop Start (ISS) technology.

The battery is encased within a reinforced polypropylene case. This, combined with the glass mat separators, creates a battery that is extremely vibration resistant.
