ABOUT

The Predator range of motorcycle and powersports batteries is one of the most comprehensive ranges available in Australia.

Made by one of the world's leading motorcycle and AGM battery manufacturers, Predator Motorcycle & Powersport batteries offer the enthusiast a truly world class battery at a value for money price.

AGM RANGE

The Predator AGM Powersport batteries are constructed with lead calcium alloy and Absorbent Glass Mat technology to provide you with total maintenance-free operation.

This design will provide you with higher amp hour capacity, longer cycle-life and greater durability. The AGM and Through-The-Wall (TTP) intercell connector technology delivers superior strength and vibration resistance, even in the most extreme conditions.

FEATURES

- Durable ABS plastic case
- Factory activated and acid pack options available
- Excellent charging acceptance and vibration resistance
- Low self-discharge
- Electrolyte suspended in AGM separators – no spillage risk
- Cast-On-Strap and TTP weld technology
- Advanced calcium lead alloy design for true maintenance-free operation

CONVENTIONAL FLOODED

The Predator conventional flooded range of Powersports batteries are designed to meet many original OEM specifications for starting and amp hour capacities.

Heavy duty glass mat/PE composite separators improve vibration resistance and through-the-wall (TTP) intercell connectors minimise internal resistance for maximum power. Quick remove vent caps and transparent casing make checking electrolyte levels easy and no fuss.

FEATURES

- High-quality composite of Glass Fibre/PE separators
- Advanced low antimony lead alloy to reduce maintenance requirements
- High capacity and long life
- Excellent charging acceptance and vibration resistance
- Sulphation resistant alloys
- TTP Through-The-Wall intercell technology.
- Dry charged design

X-SERIES

FEATURES

- AGM technology with high compression separator
- 100% leak-proof and spill-proof to 360°C
- Battery grid design structure increases continuous cranking time 10%-20% more than ordinary grids
- Excellent starting power; starting the engine even at a low state of charge
- Ideal for Jet-skis and American motorcycles
- High charging acceptance for absorbing large surges of electrical energy generated via brake energy recuperation

The Predator X-series is built for performance; with superior starting power, high reserve capacity and long-lasting life to give you more freedom out on the open road or the open sea

The AGM design allows easy, stress-free installation with no chance for acid spills; making it the smarter choice for powering your prized equipment.
