

## Technical Information

R&J Batteries Part #DIN100SMF is an advanced technology maintenance-free battery designed to power the increased electrical accessory loads in high-end, large-capacity European cars and commercial machinery. The DIN100SMF battery has more than enough reserve capacity and cranking power for even the most powerful and luxurious cars on the road today.

Features and Benefits include:

- Thicker power-frame plates for increased durability
- Silver-Calcium alloy with high tin content
- Improved resistance to heat and corrosion
- Faster charge acceptance
- Patented 'anti-sulphation' additive extends life
- Ultra-high engine cranking power
- Ultra-high reserve capacity

## Applications

Audi	Bentley
BMW	Porsche
Range Rover	VW
Fiat	Iveco Commercial
Case - IH Machinery	John Deere
New Holland	

## Technical Specifications

Battery Type:	Maintenance-Free	Container Material / Colour:	Opaque / White
Voltage:	12 V	Lid Type:	Opaque / White
Capacity (@20hr rate):	110 Ah	Plate Type:	Power-Frame Silver-Calcium
Cold Cranking Amps -18°C, SAE:	975	Separator Type:	PE Envelope
Reserve Capacity:	215 Min	Assembly Layout:	C (RHPos)
Overall Dimensions:	L 393 x W 175 x TH 190	Terminal Type:	SAE-Recessed
Wet Battery Weight:	28.3 Kg	BCI Group:	DIN100 / L6
