

ACDelco®

Batteries

ACDelco Marine/Deep Cycle Batteries are designed and tested for use in demanding marine and recreational vehicle applications. They use expanded wrought lead calcium grids, which are far more durable and stronger than conventional cast type grids. To handle deep cycle requirements they also have thicker grids and over twice the active plate material of standard automotive batteries.

- Calcium / Lead
- Sealed maintenance-free
- Polypropylene case
- Heat sealed covers
- Built in flame arrestors
- Wrought grid plates
- Patented liquid gas separator
- Built in hydrometer
- Extremely high quality
- Very low self discharge

IDEAL FOR AUXILIARY 4X4, CARAVAN/CAMPER & MARINE APPLICATIONS
