

## WARRANTY STATEMENT Motobatt Motorcycle Battery

R & J Batteries will provide the following warranty to the original purchaser subject to the terms and conditions stated herein. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

### Warranty Coverage

This warranty covers batteries that become unusable or unserviceable due to defects in material and/or workmanship. This warranty covers the battery types listed below, that are sized properly and used in the application for which it was intended and charged with an approved charging profile.

Proof of purchase and return of good(s) in question must accompany any request for warranty.

No exceptions will be accepted.

APPLICATION	WARRANTY PERIOD
AGM series	12 months
P Series Lithium	12 Months
HP series Lithium	12 Months

### Warranty Exclusions

This warranty does not apply to batteries that break or fail due to abuse or neglect such as improper installation, application, loose wiring, corroded terminal connections, mishandled or dropped batteries, freezing, re, explosion, or unauthorized battery medications. As per Australian Consumer Law if the battery usage is not for personal, domestic or household use, then R & J Batteries will not be responsible or liable for any consequential or incidental expense or loss. This warranty does not cover batteries that are not charged properly or batteries that are left for extended periods in a low state of charge causing sulphation. Batteries must be kept in a fully charged state.

### Lithium Batteries

Lithium batteries must only be recharged using chargers designed to be compatible with lithium batteries. Use of a non-lithium compatible charger voids the warranty.

A Motobatt Lithium "P" model, that has been discharged beyond 8 volts may consequently be rendered non-rechargeable, and any resulting claim will not be accepted, unless it can be proved that the battery was faulty prior to discharge. Aggressive, repeated charge/discharge may damage a lithium battery.

Motobatt Lithium "HP" models include a safety auto shutdown feature when discharged under 8 volts. The battery may appear dead with zero volts, but this is normal operation, and not a warranty claim. The battery may be brought back to life by recharging with a lithium compatible charger or return it to your nearest R & J battery store and we can assist you.

To request a warranty claim, please contact your nearest R & J Batteries store on 1300 769 282 or find our nearest store at [www.rjbatt.com.au](http://www.rjbatt.com.au)
